

Vehicle Booking System & Location Management

PASS on Point

High gate peaks? Errors during loading and unloading? Keeping control of the traffic flow at your site can be quite a challenge.

The PASS on Point system contains a Vehicle Booking System and a Location Management System that offers more insights as a basis for processing more volume, enabling faster throughput and avoiding errors at the docs. Through technology at the gate truck visit will be automatically verified against the pre-booking, allowing drivers to check in quick and easy.

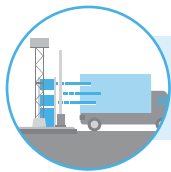

1. Pre-scheduled visits enable efficient operations

2. Automatic recognition ensures fast & secure entering

3. Synchronize dock & equipment operations with truck visits

4. Fast truck turnaround time at your site

System Features

- Online and real-time system to book a time slot or dock door reservation.
- Unique account and login environment to a web- and cloud based application for each client.
- Accurate management of traffic flow for the warehouse.
- Allocate appropriate resources according to planned traffic flow at warehouse and dock (range).
- 'Truck driver stay in your truck' principle.

Main Benefits

Primary benefits of the PASS on Point System include:

Improved Truck Turnaround times

Trucks no longer have to wait for visit verification at the gate. Scheduled visits are ready to be loaded on time.

Optimized operations

Visibility of appointments ensures perfect coordination of location, people and machinery.

Less errors

The more information is pre-announced, the less time is spent onsite to correct errors.

Increased Security

Register & control Truck, Driver and Cargo movements at your site. Reduce security claims

Improved Client Satisfaction

Fast Service, Improved transparency

Reduced administration costs

Online bookings reduce administration work at the warehouse and saves time and costs.

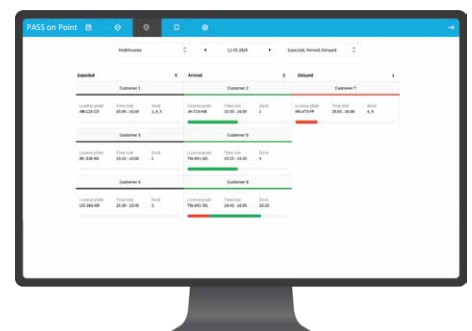

Better hygiene

The less human intervention, the more hygienic

KEEP CONTROL OF
THE TRAFFIC FLOW
AT YOUR SITE

Feature overview

CERTUS PASS on Point

PASS on Point Fundamentals (always included)
Vehicle Booking System
Location Management System
